```java
package OopsConcept;

class Person {

        private int age;

        public int getAge() {

          return age;

        }

        public void setAge(int age) {

          this.age = age;

        }
        }

 class Encapsuation {
        public static void main(String[] args) {

          Person p1 = new Person();

          p1.setAge(23);
```

```java
        System.out.println("My age is " + p1.getAge());

    }

}
```
